As a leader in custom industrial automation and machinery, PCT recognizes the importance of integrating safety into every job. That's why our team offers consulting, safety assessments, and complete solutions from design to implementation with certified Functional Safety Engineers on staff. We can work independently or with your team to develop the necessary improvements for your company.

Moreover, PCT offers both mechanical and electrical engineering services to deliver a comprehensive safety solution. Whether you are installing a new machine or you're dealing with legacy equipment that needs to meet modern safety standards, PCT can get the job done.

Mechanical and electrical engineering in one firm

Over 30 years experience
